

PORTLAND ARTS & VOCATIONAL EDUCATION
CENTRE

A message to our PAVE supporters:

In March of 2020 when the pandemic hit the world, we were faced with unprecedented challenges causing us to redesign our programs. Despite the involuntary distance our focus has remained steadfast on continuing our mission of developing Jamaica's youth. We have remained committed to providing the same level of support for our students regardless of the new daily challenges before us. While following government protocols we have still been able to hold classes, workshops, beach and roadside clean ups. A big thank you goes out to everyone for their patience, flexibility and understanding.

As the world begins to adapt to life beyond the pandemic, we are full of hope and gratitude thanks to our new facility. With this building we will be able to host up to four classes simultaneously and incorporate online learning with the implementation of a computer lab. An office space will also be created for the effective operation of the foundation. We are excited to continue looking for ways to further the involvement of our community members as we operate within the restrictions of the COVID parameters.

We look forward to a great future at PAVE!

Sincerely yours,
Nasha Johnson

Our latest Workshop!

High quality soap making led by Jennifer Jones, a local entrepreneur. These PAVE graduates who participated in this workshop are now able to use this new skill to become more employable.
